ZACO

X1000

Commercial Cobotic Vacuum Cleaner

Propel your Productivity

With the X1000 taking care of vacuuming main areas, your staff are free to raise standards in other areas across site. Plus, as the X1000 has up to 384 Air Watts of vacuum power, it achieves the highest cleaning standards.

No Wi-Fi? No Drama

The X1000 can connect to Wi-Fi for App connectivity, real time status and over-the-air updates or you can use the 5 inch touch screen to access all of the machine's features including mapping and activating the cobot.

Manageable Maintenance

A simple, modular design allows your operatives to quickly empty the X1000 after each shift. Rollers, filters and batteries are easily replaced so you can service your X1000 as quickly as you can change a vacuum bag!

Multiple Maps

Along with its' Sensors and Camera, the X1000 has a 3D LiDAR to help with mapping and scanning. Up to 3 maps and cleaning programmes can be stored allowing the X1000 cover different areas across any site.

Obstacle Avoidance

The X1000 is equipped with two Ultrasonic Sensors, Dual Stereo Cameras and three TOF Sensors (one 3D and two 2D) that work together to avoid collisions giving you peace of mind.

Safer Spaces

HEPA H13 filtration is standard on the X1000 so the machine cleans the air as well as the floor. The X1000 creates safer, healthier and cleaner environments.

Complete Connectivity

The X1000 can be connected to Wi-Fi. Software updates will automatically be installed over the air. App users can remotely check the real-time status of the machine, choose and activate cleaning programmes as well as adjust cleaning schedules.

Service Station

Every X1000 has a Service Station at no extra cost. The machine will automatically return to the Service Station at the end of the cleaning cycle to charge its' batteries.

Perfect Ports

The X1000 is supplied with both a dual-roller and straight suction ports so it can be set up ideally for the surfaces on your site.
